A N **ALMANACK**

For the Year of Our L O R D,
M D C L X X X V I I I.

Being Bissextile or Leap-year,
And from the Creation

5637.

The Vulgar Notes of which are

*Golden Number 17 } Circle of the ☽ 17
Epact 07 } Domin: Letters A G*

Calculated for and fitted to the Meridian of Boston in
New-England, where the North Pole is elevated 42
gr. 30 m.

By John Tulley.

Imprimatur Edw: Randolph: Secr:

BOSTON,
Printed by Samuel Green.

1688.

Of the Eclipses 1688.

There will be four Eclipses this Year, two of the Sun, and two of the Moon, whereof there will be but one visible to us here in New-England, and that will be of the Moon, which will happen the 29 of September in 10 gr. 55 min. of Aries: the Eclipse begins about half an hour past 4 in the Morning; the middle of the Eclipse or true opposition of the Luminaries will be 7 min. past 6 in the Morning, at which time more than half the Moons Body will be darkened on the upper part thereof, passing through the lower part of the Earths conical shadow; the Moon will set and Sun risen above our Horizon above an hour before the Eclipse be finished.

As concerning the following Almanack, it is so plain to be understood, that it needeth no Explanation; the head of each Column declarereth the contents thereof: and whereas what is hinted about the Weather is guessed at from the Signs, Planets, and their Aspects; ancient Writers have been often deceived about the Weather, and therefore I do desire a charitable censure concerning it.

The last Column in each Page sheweth the time of Full Sea or High-water at Boston, which agreeth with the time of Full Sea or High-Water at Say-Brook; but it flows sooner without the Bar at least three quarters of an hour, and therefore Mariners going in or out may hereby be informed to mind the Tide.

JANUARY hath 31. Dayes.
